Art –

For Issue #2, the dates are fine.

Please replace the existing narrative under “Remedy Performance – Other Issue” with the following:

The FYR included a recommendation that the Navy conduct a long-term protectiveness evaluation of the radiological remediation goals (RGs) included in site decision documents.

Please replace the existing narrative under “Remedy Performance – Other Recommendation” with the following:

In 2019, the Navy issued two draft addenda evaluating the long-term protectiveness of the RGs. The Navy finalized the first addendum, evaluating the protectiveness of the soil RGs, in June 2020. The Navy issued the second addendum, evaluating the protectiveness of the building RGs, in October 2019. In August 2020, EPA provided written comments to the Navy on the draft building addendum and is awaiting the Navy’s response. The Region has consulted with EPA Headquarters (FFRO and OSRTI) as part of the evaluation because of national issues raised by the evaluation. The primary issue is the use of Argonne National Laboratory’s RESRAD BUILD calculator to evaluate radiation risk to human health rather than EPA’s Building Preliminary Remediation Goal (PRG) calculator.
